To Whom It May Concern:

Teck Cominco contracted Canadian Industrial Mill Services Ltd. (CIMS), as the General Contractor for the repairs to the Teck Cominco KIVCET Boiler in February 2004. As such CIMS was responsible for the supporting subcontractors, cost reporting and site safety.

In this circumstance CIMS provided an excellent team capable of meeting the many challenges presented. The end result was a successful project that involved in the order of 60,000 man-hours without a lost time injury.

Yours truly,
